

Assessing Public Toilet Facilities in Kerala: Establishing Baseline Data for Improved Service Provision

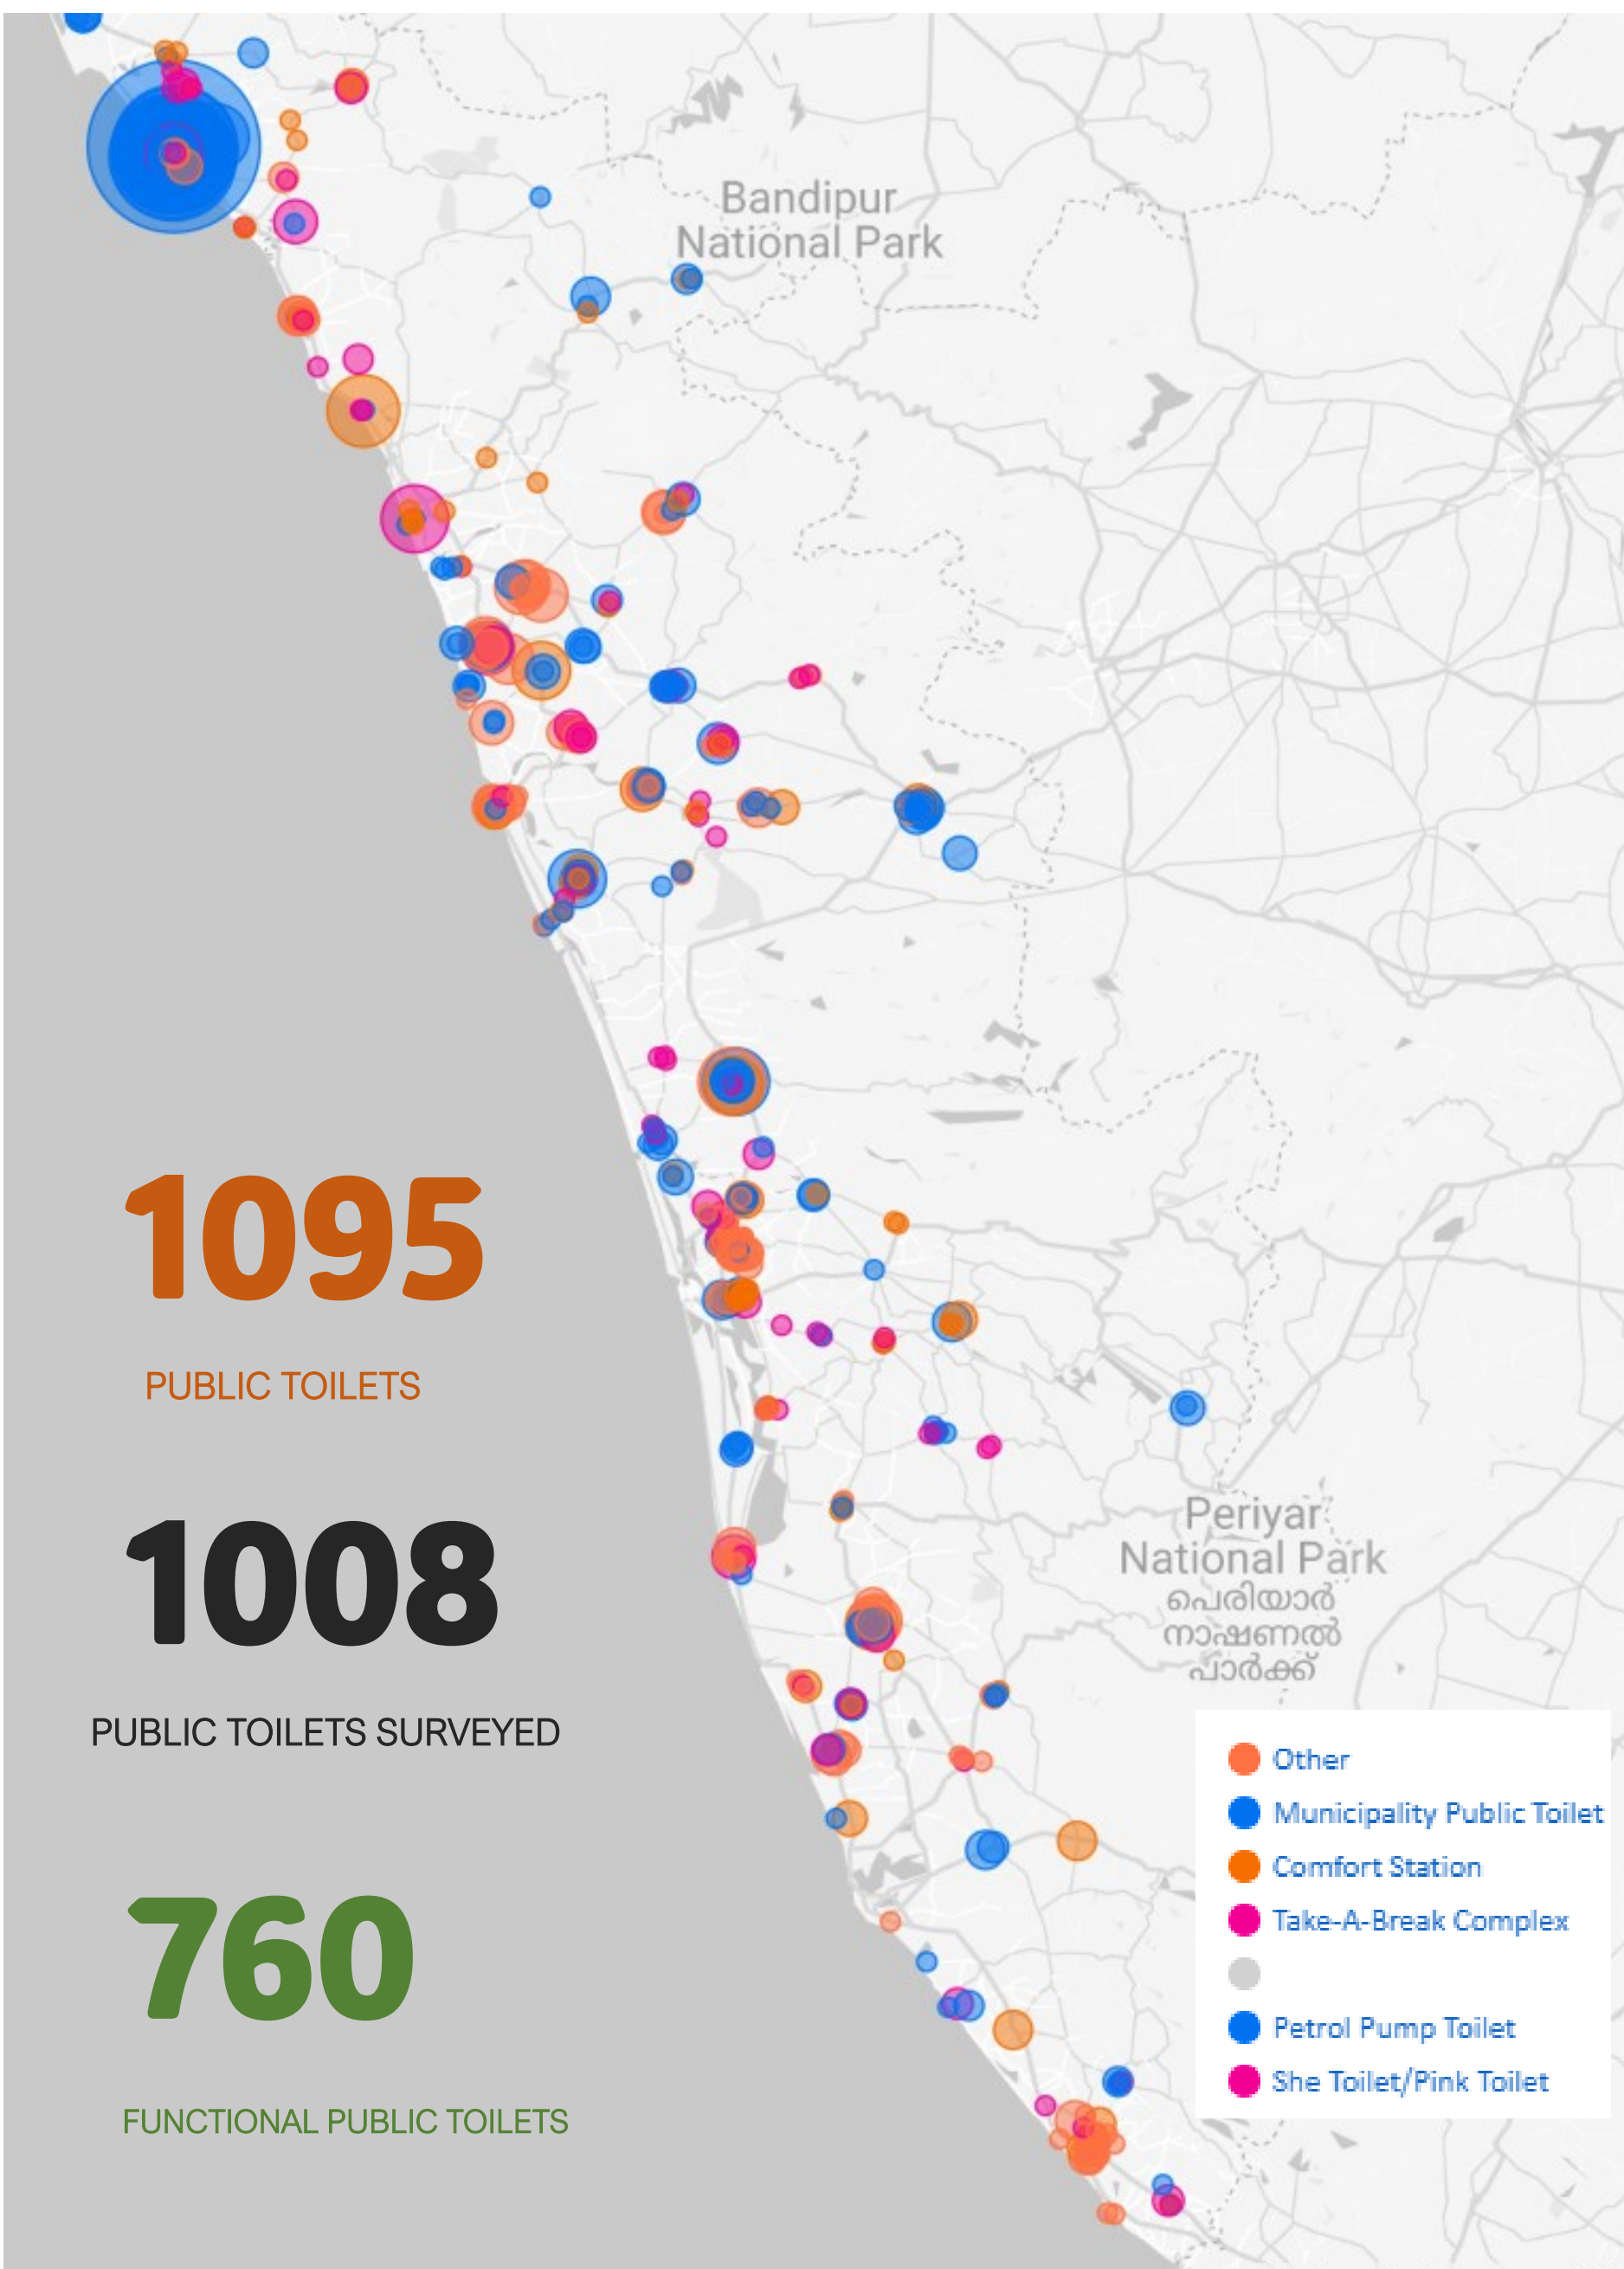

Devika Hemalatha Devi | Praveen Nagaraja | Aswin S Kumar | Eirene Durom

AIM

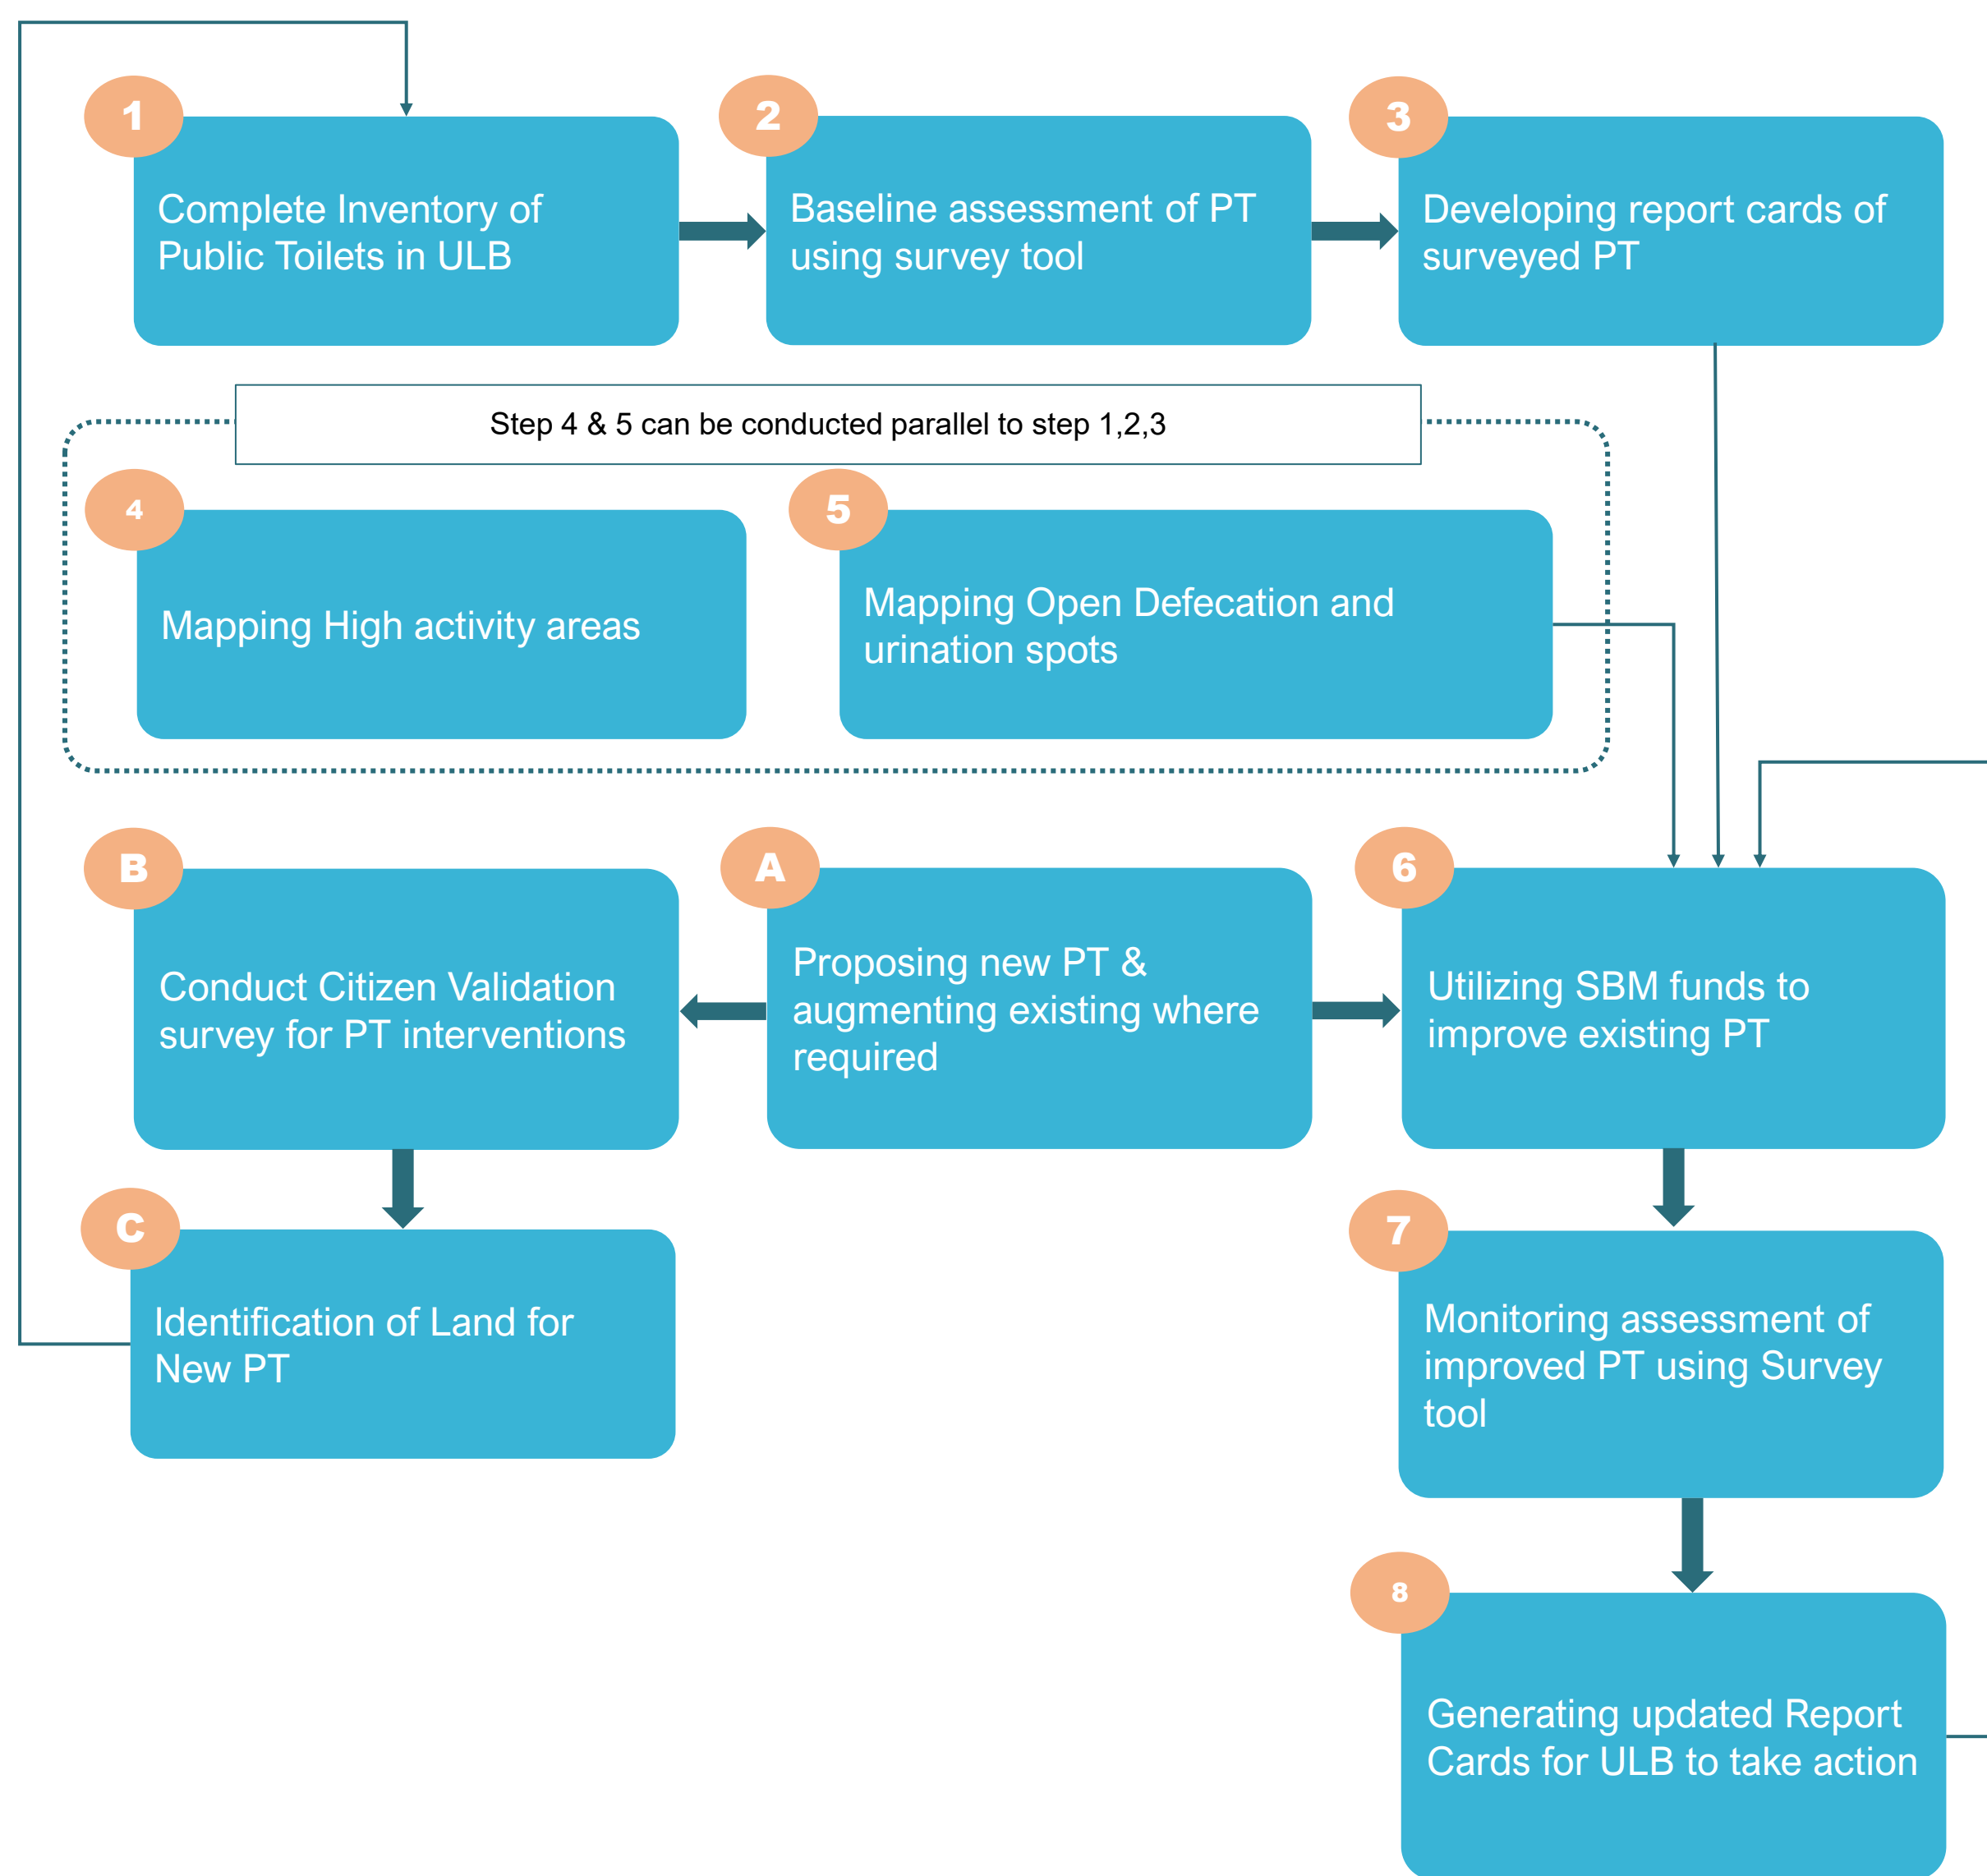

To evaluate public toilet infrastructure on a **Five Star (100 point)**

Rating System and create an **information baseline** that will help ULBs upgrade existing Public Toilet infrastructure.

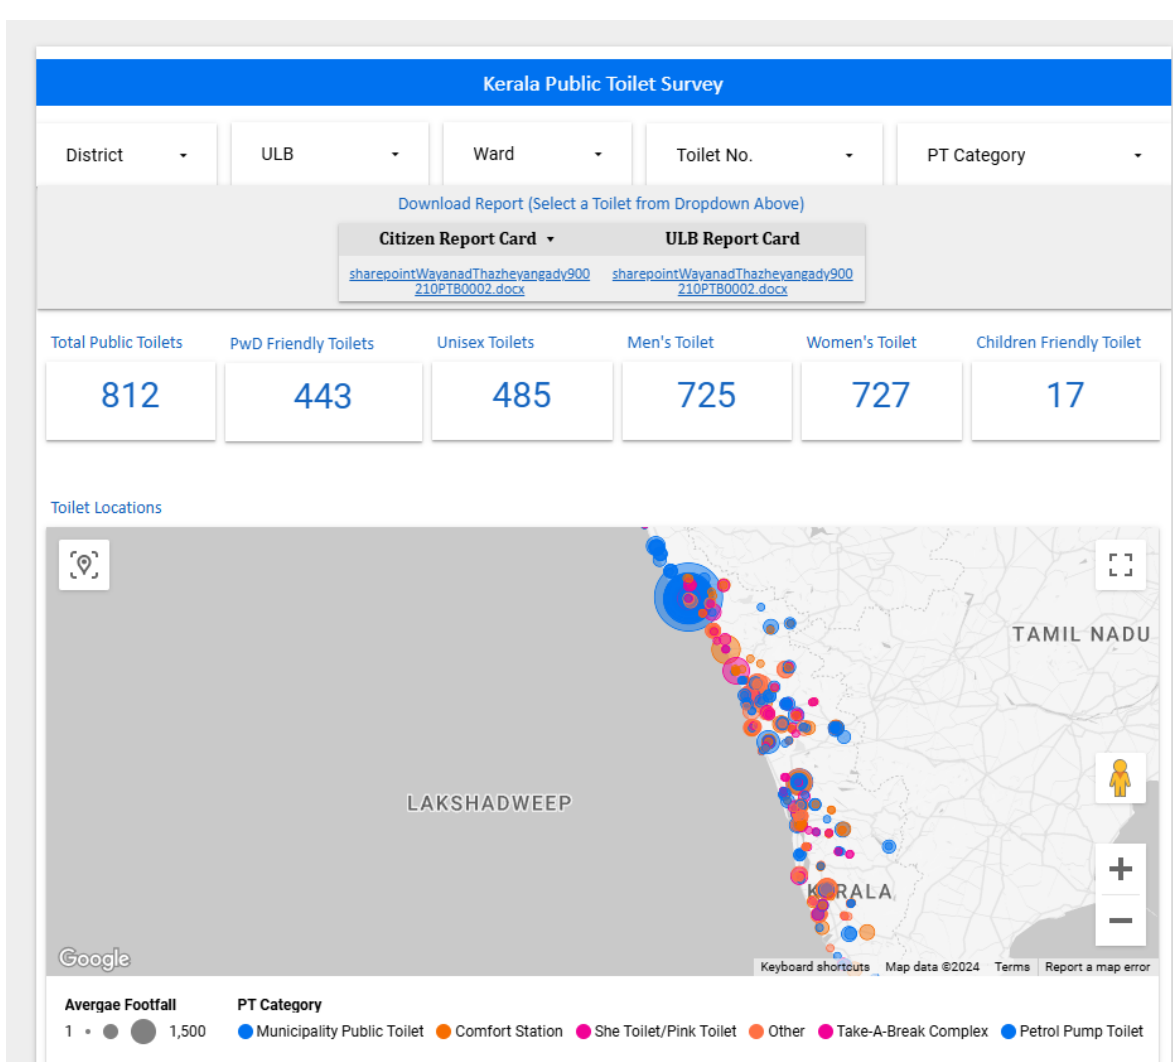

OBJECTIVES

- Defining a Toilet Rating Index that assesses service quality and functionality in Public Toilets.
- Identifying specific PT interventions via dashboard and report card mechanisms, at individual toilet level.
- Identifying existing service arrangements, training, and monitoring needs to support superior PT service.

OUTPUTS

PUBLIC TOILET DASHBOARD

PT REPORT CARD

PRELIMINARY SURVEY FINDINGS
