

About CWAS, CRDF, CEPT...

CEPT University's core focus is human habitat. Through its education, research and advisory activities, it strives to improve the impact of habitat professions in enriching the lives of people in India's villages, towns and cities.

CEPT Research and Development Foundation (CRDF) has been established by the University to manage their research and capacity building activities. There are nine domain-focused centers in the CRDF. The Center for Water and Sanitation (CWAS) is among the first center to be established.

CWAS began its work in 2009 with focus on improving water and sanitation services in India. It carries out activities related to action research and capacity building – working closely with city and state governments, enabling them to improve delivery of services. CWAS is closely engaged with Faculty of Planning at CEPT University. CWAS team teach and guide students of Faculty of Planning.

What are Sustainable Development Goals?

- In 2012, UN conference took place in Brazil to discuss on SDGs.
- On 25 Sept 2015, 193 countries of the UN General Assembly adopted the 2030 Development Agenda titled "Transforming our world: the 2030 Agenda for Sustainable Development."
- **17** Sustainable development goals with **169** targets have been defined that meets the needs of the present without compromising the ability of future generations to meet their own needs.

Earlier - Millennium Development Goals

- MDGs were set of international goals that have been adopted by UN in year 2000.
- MDGs were focusing more on poverty reduction.
- The SDGs were adopted in 2015 and have a target date of 2030. There are 17 SDGs, which cover a wider range of issues than the MDGs, including climate change, inequality, and peace and justice

Feature	MDGs	SDGs
Number of goals	8	17
Scope	Focused on poverty reduction	More comprehensive, including climate change, inequality, and peace and justice
Target date	2015	2030
Focus	Developing countries	All countries
Approach	Goal-based	System-based

Sustainable Development Goals and WASH programme

Sustainable Development Goals – Goal 6

Goal 6 – Clean Water and Sanitation

Targets of Goal 6

TARGET 6-1	TARGET 6-2	TARGET 6-3	TARGET 6-4
SAFE AND AFFORDABLE DRINKING WATER	END OPEN DEFECACTION AND PROVIDE ACCESS TO SANITATION AND HYGIENE	IMPROVE WATER QUALITY, WASTEWATER TREATMENT AND SAFE REUSE	INCREASE WATER-USE EFFICIENCY AND ENSURE FRESHWATER SUPPLIES
TARGET 6-5	TARGET 6-6	TARGET 6-A	TARGET 6-B
IMPLEMENT INTEGRATED WATER RESOURCES MANAGEMENT	PROTECT AND RESTORE WATER-RELATED ECOSYSTEMS	EXPAND WATER AND SANITATION SUPPORT TO DEVELOPING COUNTRIES	SUPPORT LOCAL ENGAGEMENT IN WATER AND SANITATION MANAGEMENT

Joint Monitoring Program for SDG – Goal 6

- JMP for SDGs is a collaborative initiative by **UNICEF** and **WHO**
- The JMP is responsible for **monitoring global progress** towards WASH i.e. SDG 6.
- JMP collects and analyzes data from various sources:
 - national surveys,
 - censuses,
 - administrative records,
 - reports from governments,
 - progress achieved in national missions
- JMP has been reporting progress on WASH since **1990**.

Global coverage of SDG for Drinking Water

In 2022, one in four people lacked safely managed drinking water and regional coverage varied widely

FIGURE 2 Global and regional drinking water coverage, 2015–2022 (%)

Global coverage of SDG for Drinking Water

In 2022, 142 countries had estimates for safely managed drinking water

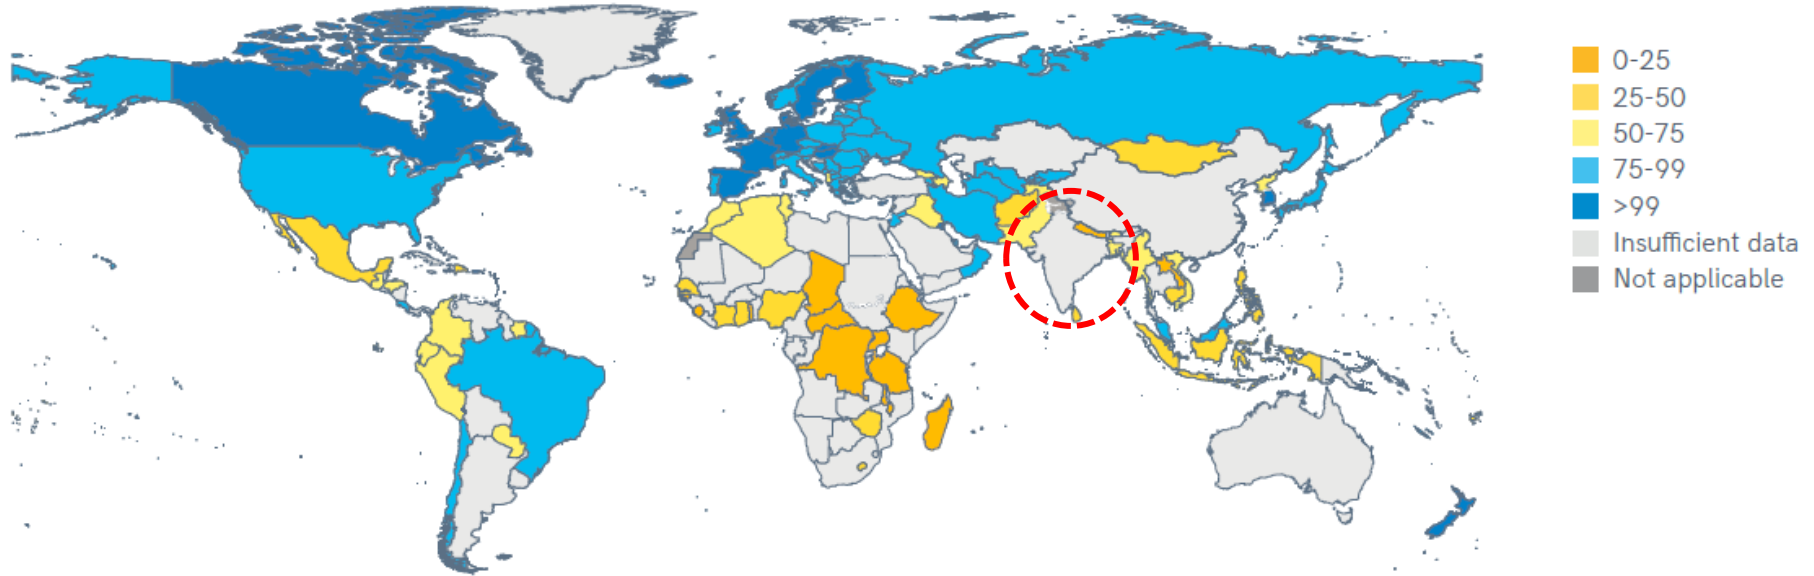

FIGURE 3 Proportion of population using safely managed drinking water services, 2022 (%)

Definitions of Water Supply Service Ladder

SERVICE LEVEL	DEFINITION
SAFELY MANAGED	Drinking water from an improved source that is accessible on premises, available when needed and free from faecal and priority chemical contamination
BASIC	Drinking water from an improved source, provided collection time is not more than 30 minutes for a round trip, including queuing
LIMITED	Drinking water from an improved source, for which collection time exceeds 30 minutes for a round trip, including queuing
UNIMPROVED	Drinking water from an unprotected dug well or unprotected spring
SURFACE WATER	Drinking water directly from a river, dam, lake, pond, stream, canal or irrigation canal

Global coverage of SDG for Sanitation

In 2022, two out of five people lacked safely managed sanitation and regional coverage varied widely

FIGURE 4 Global and regional sanitation coverage, 2015-2022 (%)

Global coverage of SDG for Sanitation

In 2022, 135 countries had estimates for safely managed sanitation services

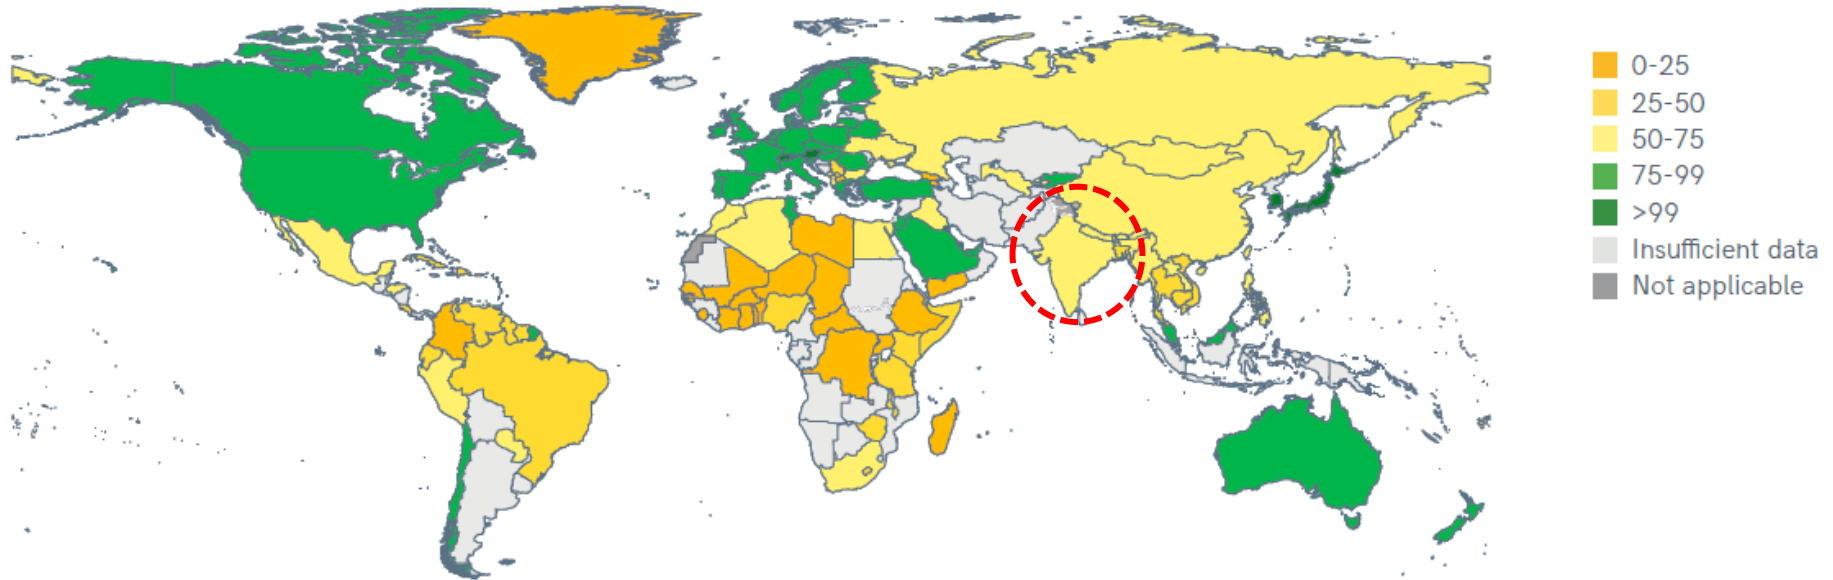

FIGURE 5 Proportion of population using safely managed sanitation services, 2022 (%)

Definitions of Sanitation Service Ladder

SERVICE LEVEL	DEFINITION
SAFELY MANAGED	Use of improved facilities that are not shared with other households and where excreta are safely disposed of in situ or removed and treated off-site
BASIC	Use of improved facilities that are not shared with other households
LIMITED	Use of improved facilities that are shared with other households
UNIMPROVED	Use of pit latrines without a slab or platform, hanging latrines or bucket latrines
OPEN DEFECATION	Disposal of human faeces in fields, forests, bushes, open bodies of water, beaches or other open places, or with solid waste

* No estimate is available in 2022

Achievement against SDG 6

- Billions of people have gained access to drinking water, sanitation and hygiene services since 2000.

Coverage of Hygiene - SDG 6

- Since 2015, 18 countries have increased coverage of basic hygiene services by at least 5%
- In India and other countries such as Pakistan, Bangladesh, Cambodia and Mongolia, the coverage increased by 2%

How far are we to achieve SDG 2030?

IMPLEMENTATION
NEEDS ACCELERATION

How far are we to achieve SDG 2030?

- At mid-point of the SDG period, the **world is not on track** to achieve SDG targets 6.1 and 6.2.
- Achieving universal coverage by 2030, it requires:

■ At least basic
 ■ Safely managed
 ■ No open defecation
 ■ At least basic
 ■ Safely managed
 ■ Basic
 --- Current rate of progress continues
 - - - Accelerated progress
 ■ Required acceleration

TO MEET 2030 TARGETS,
PACE OF PROGRESS WILL HAVE TO ACCELERATE

How Engineers can Contribute for Achieving SDGs?

- Linking WASH data with Property tax system
- Include WASH data in property tax survey and periodically conduct assessment of properties within the ULB
- Provide reliable data by following proper steps to measure and record data for WASH systems
- Set up a fixed regime and maintain regular frequency for data collection and data reporting under various missions
- Ensuring services are reaching to the urban poor and all gender
