

Online assessment system for water and sanitation services in India

World Water Week 2015

Need for performance information

Government of India (GoI) has launched various programs for water supply and sanitation service improvements:

- ❑ Swachh Bharat Mission – Thrust on elimination of open defecation and cleanliness
- ❑ AMRUT – To achieve benchmark of universal coverage of water supply and sanitation
- ❑ Smart cities – Promote cities that provide core infrastructure and give a decent quality of life to its citizens

Monitoring outcome of these programs require assessment of service levels.

Funding is linked to service level improvement
Online performance assessment tool
developed by PAS helps in monitoring
service level improvement

PAS

Assess service delivery in water and sanitation

profile for **400⁺** Cities

Performance Assessment System

in **2** States for **6** years

National database for 1800 cities
For 18 states for 3 years

www.pas.org.in

Water supply, Waste Water, Solid waste Management & Storm Water

misallocated investments??

And YET.....

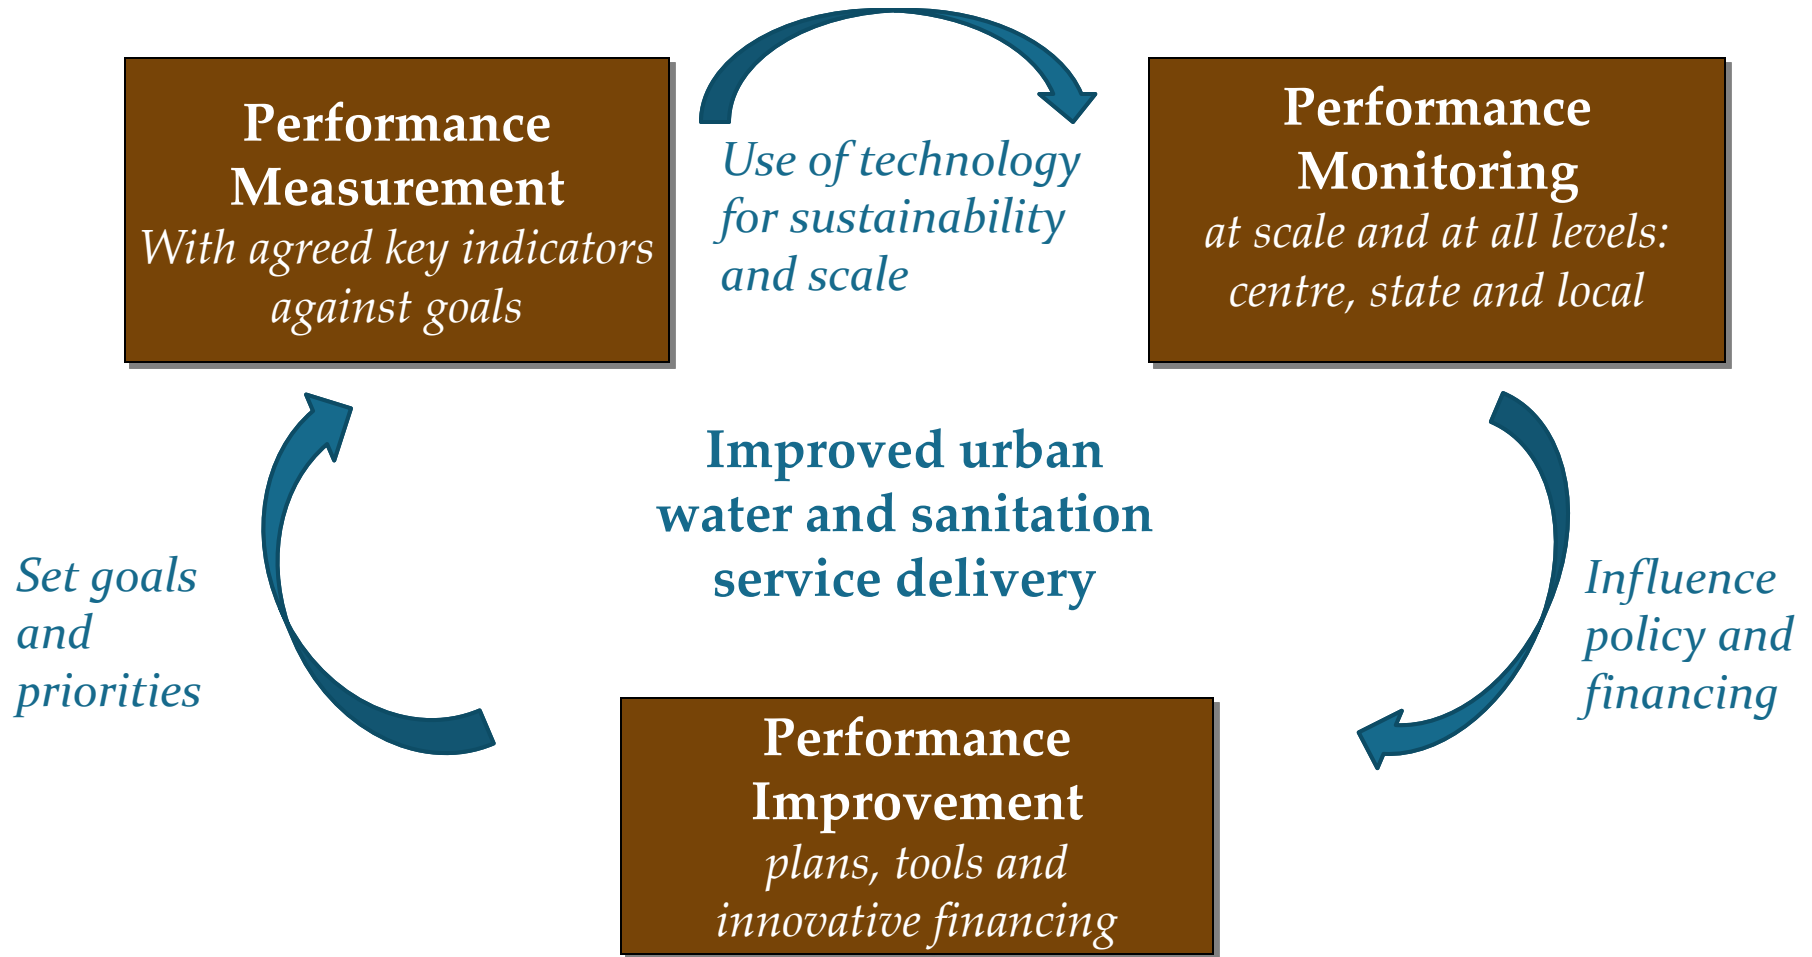

APPROVED COST FOR SEWERAGE PROJECTS
~~\$2.58 Bn~~ ~~4.6%~~ ~~UNNORM~~ LACK OF PREMISES
LATRINE FACILITY

FUNDS ALLOCATED FOR SEWERAGE PROJECTS
OPEN DEFECATION \$2.61 Mn

APPROVED COST FOR WATER SUPPLY PROJECTS
~~\$3.58 Bn~~ ~~4.4%~~ ~~UNNORM~~ LACK OF PREMISES
WATER SUPPLY FACILITY

FUNDS ALLOCATED FOR WATER SUPPLY PROJECTS
UNTREATED \$2.61 Mn
TAP WATER 8.6%

PAS Approach – moving to a virtuous cycle

Measure and monitor performance to reward and learn from success and demonstrate results

We have come a long way from this

Data management practices in Indian cities

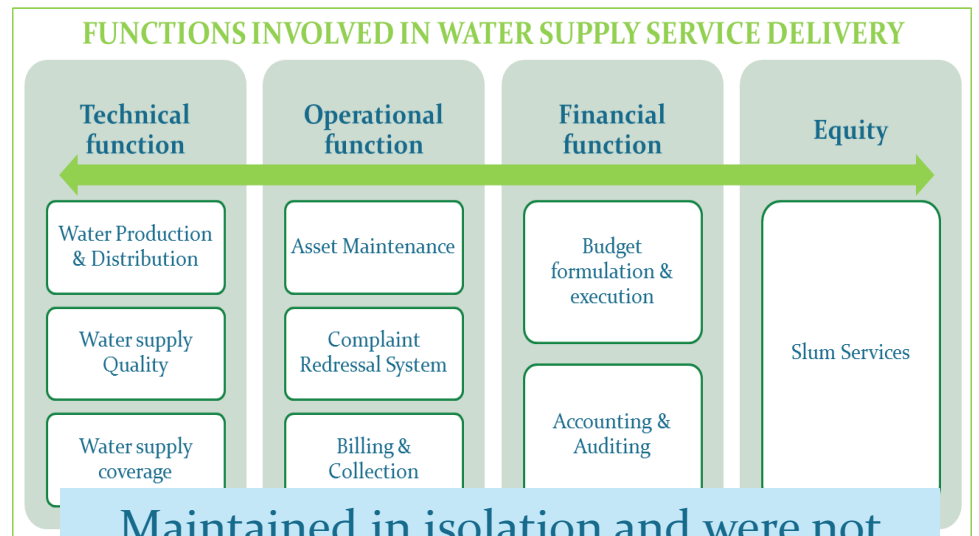

Absence of data recording system at ground level

If recorded, then it was not collated to be analyzed / reported to higher level

Most of the records are paper based and fragmented.

Maintained in isolation and were not usually shared with each other

Time taken for annual assessment

Annual Assessment in GUJARAT over five year assessment period

Annual Assessment in MAHARASHTRA over five year assessment period

Support by State Government for Annual Assessment

Training in use of tools

capacity building

Tools translated in local language

Support for resolving data issues

Constant hand holding by PAS team

Data collection through city visits in Year I (2008-09), supported by Partners

Data collection through online modules in Year V (2012-13). Self assessment by select ULBs

State Profile

Know Your City

Access and Coverage

Access & Coverage

Highlights the % of households having individual access to services of water supply, waste water and solid waste management

State profile of all SLBs

Trend Analysis

Background of Achalpur

GENERAL INFORMATION		
Class	Class A	No. of slum settlements
City	Chennai	Slum population
Area (sq. km.)	34.5	Slum households
Total city population	127,514.0	Total annual city capital receipts
Total households	26,765.0	Total annual city capital expenditure
Density (persons per sq. km.)	7,007.3	Total annual city revenue receipts
Total municipal staff	468.0	Total annual city revenue expenditure

City Profile of Achalpur

Overview of all cities

Ahmedabad: Compare your city

City profile of all SLBs

Select State: Gujarat

Select City: Ahmedabad

Select Financial Year: FY 2013-2014

Select Sector: Water

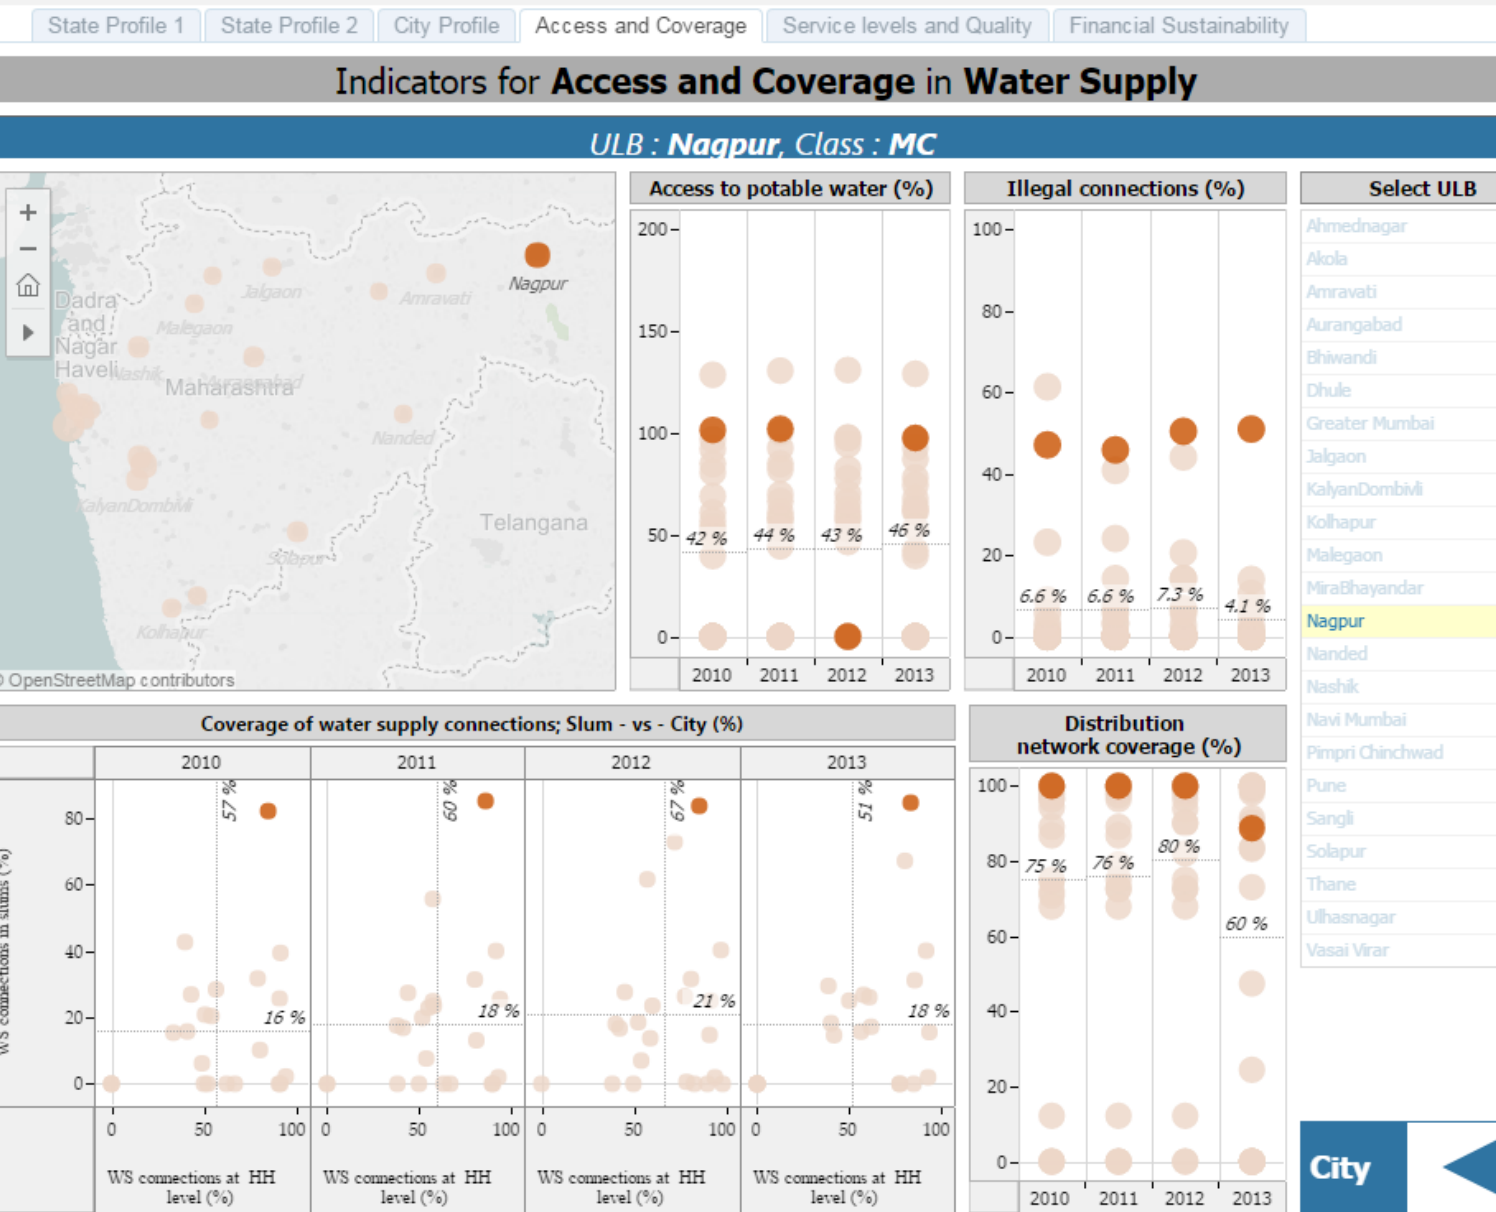

Select Indicator: Coverage of water supply connections(%)

Compare With: District & Class

Type of Class: Municipal Corporation

Compare with peers

State and city level interactive dashboard

Interactive data visualization that provides valuable insight

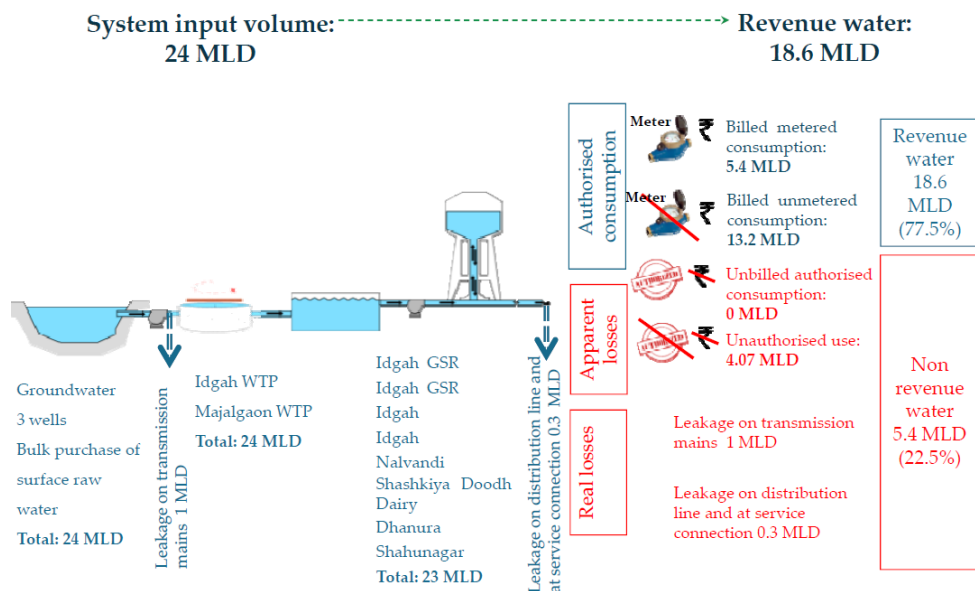

Allows drilling down from indicators, charts and maps to read data better

Allows combination of multiple data sources to keep track of performance

Indicates points of action or decision required

City level assessment reports

Schematic diagram of water supply system

Theme wise analysis reports

Access and coverage

Equity in access to service

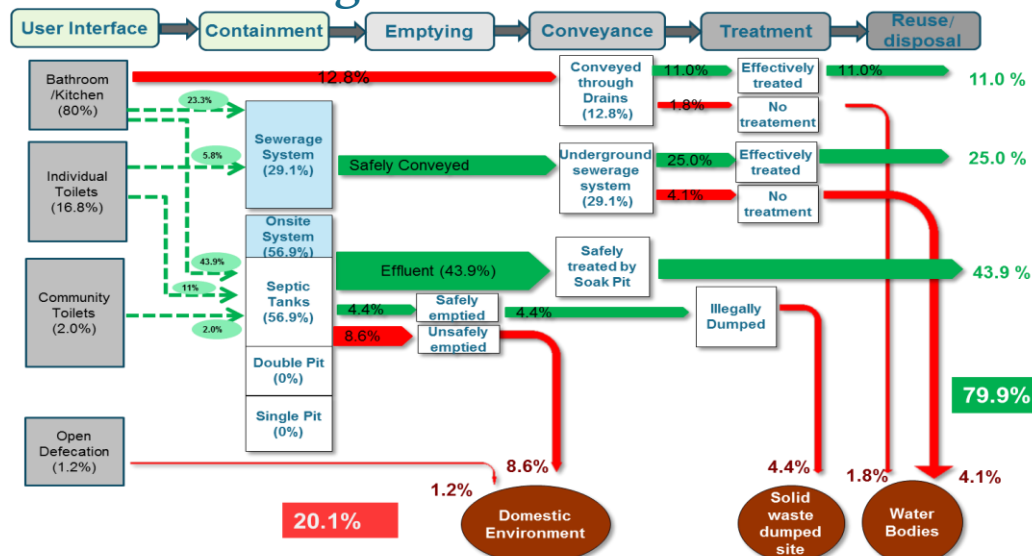

Service level and quality

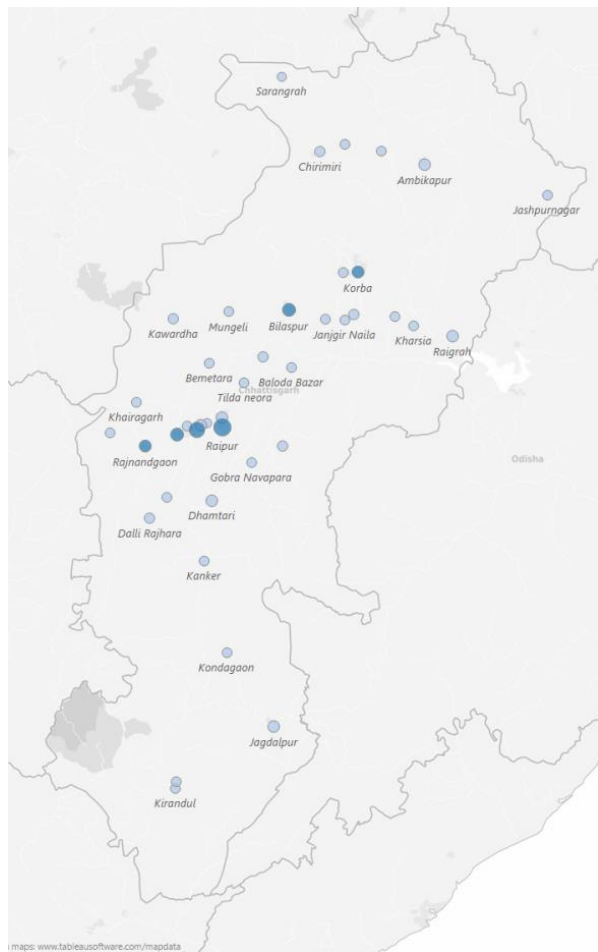

Efficiency in service operations

Wastewater diagram

Financial sustainability

Replication in Other states

Chhattisgarh State (6 million urban population) has used online PAS – SLB module for data collection and analysis for the year 2014-15

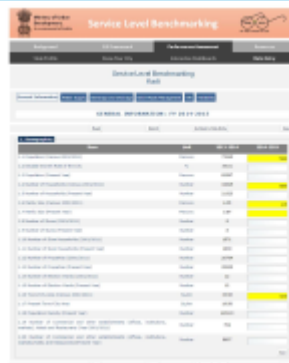

Now available online on www.pas.org.in

**NATIONAL DATABASE
for 1800 CITIES for
18 STATES for 3 YEARS**

Comparison of state wise share of slum HHs with share of slum HHs resorting to OD

Online system can be used for monitoring various government programmes : Smart cities, AMRUT, Swatchh Bharat Abhiyan

Roll out in Other states: CEPT in partnership with National Institute of Urban Affairs (NIUA) will provide technical support to interested states

Approach to performance improvement planning

Conventional Approach

'PROJECT'
based approach

Oriented towards **OUTPUTS**

SUPPLY DRIVEN

Focus on **INDIVIDUAL PROJECTS**

PAS Approach

'SERVICE'
based approach

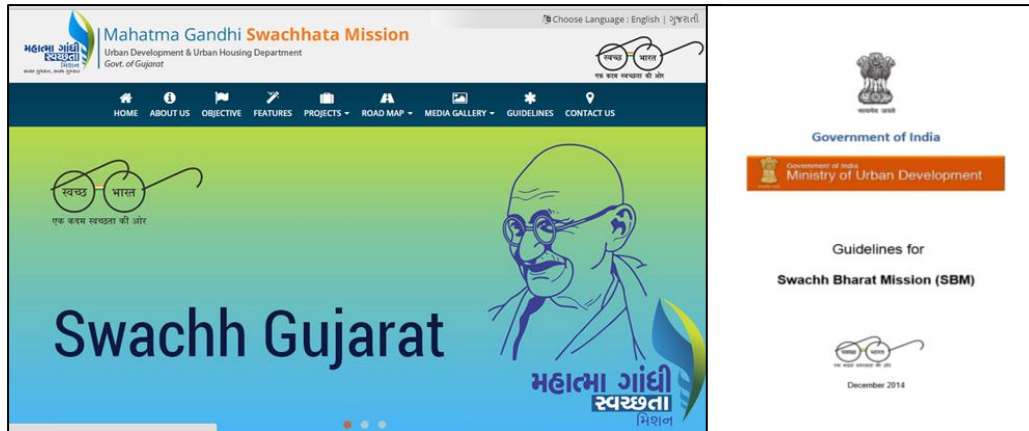

Oriented towards **OUTCOMES**

Starting point is current performance – **NEED DRIVEN**

Focus on **SECTORAL SOLUTIONS**

Performance Assessment to Improvement

State Level

UWSS information is used in preparation of policies for improvement of urban sanitation

Gujarat - Mahatma Gandhi Swachhta Mission

Maharashtra - Swachh Maharashtra Abhiyan

Monitor service level improvements through various UWSS programme / projects

Recommendations to introduce performance base grant system in Gujarat and Maharashtra

What value additions did we intend to bring?

- **No Pilots**.....operate at Scale to make an impact
- **Work with all levels of Governments** – National, State and Local and influence policies and implementation
- **Capacity building** of city and state level officials on Benchmarking
- Develop a system that can be **mainstreamed and sustained in the government** with its own resources
- Focus on the **‘real’ context for benchmarking** water and sanitation in developing country context – equity, on-site sanitation

Key lessons

- ❑ **Scale is critical** to demonstrate importance of performance assessment systems
- ❑ **Working with governments is essential**, but so is patience.....adequate time required to mainstream in government system – 5 to 7 years
- ❑ **Government ownership and regular reviews** are essential
- ❑ Once fully set up, PAS can be used for both **outcome monitoring and rational investment decisions**
- ❑ Benchmarking exercise needs to be linked to **performance based funding**

Thank You
