

# Perspective of a Private Desludging Enterprise on Scheduled emptying

Summet Facilities Pvt. Ltd

# Sumeet Facilities Pvt Ltd. is the Service Provider for Scheduled Emptying in Wai and Sinnar

## Legal / Inception / Place

- Established in 1992
- Facility Management Services is the core business

## SUMEET GROUP

- Presence in 13 states in India
- 3 International Offices
- 450+ clients
- 25000 + employees
- Revenue in excess of 80 million USD
- More than 7 certifications/accreditations
- First company to be awarded contract for scheduled desludging in 2 cities in India

# Private sector perspective while working with LGs

## Delayed payments

*“Ideally, bills should be cleared in 30 days, and for late payments, interest should be paid at the rate of 8% per annum.” – Manisha Enterprises*

## Cost escalation

*“For a fixed-fee contract for regulated schedule, we cannot offer 24 hour emergency service. We will only work 8 hours a day, otherwise it is likely that we will over-use our truck.” - Aditya Enterprises*

*“Another key issue is the escalation of fuel costs. The contract should clearly account for that.” – ZR Enterprises*

## Transparent procurement

*“We would rather not deal with the ULB directly, there are always issues with internal politics. If there is a mediator in between then we would be interested.” - Envicare*

## Termination

*The contract should have a clause defining a 3 month notification period in case of termination. It should also have a dispute resolution mechanism.” – Kadam Enterprises*

## Performance risks

*“If we work on a regulated schedule, it will be difficult to get household signatures. That will become complicated, and I don't want my payment to suffer.”- Ugale Septic Tank Cleaning Services*

*“I have tried to do a regulated schedule on my route, but that has been difficult. People always say, “come back later”, and it falls apart.” – Aditya Enterprises*

# Key clauses: Design of Performance Based Contracts (PBC)

Delayed payments

Cost escalation

Transparent procurement

Termination

Performance risks

## Assured and timely payments

- **Sanitation tax** collected from all the properties as a part of property tax and then paid to the service provider. This ensured fixed yearly revenue generation for providing the service.
- **Escrow account** in a bank to channelize monthly payment of fees. The account would at any point of time have a minimum balance equal to three times monthly fee of the contractor.

## Fixed target for emptying

- **Fixed target** of septic tank to be emptied per day for the stipulated years
- Assurance to the private player about the **fixed quantum of work** and thus, they are keen to invest and work under such contracts.
- **A fixed route plan** also helps the operator to make **optimum use of fuel and time**.

## Less scope of disputes

- Clearly defined **roles and responsibility** of private contractor
- Identification of **activities not expected** e.g.: manual scavenging, repairs of septic tanks, opening of access covers etc

# A WIN-WIN Situation for all....

## LOCAL GOVT

- Mandate to ensure service provision.
- Challenges in FSSM
  - Improper onsite systems not conforming to standards.
  - No treatment facility & unsafe disposal.
  - Limited funds, manpower, equipment.
  - Low technical know-how.

## PRIVATE SECTOR

- Already Active
- Better access to technology and knowhow
- Competitive prices

## WIN – WIN SITUATION

- ULB's are able to ensure adequate services & standards.
- Citizens get timely services at competitive prices.
- Entrepreneurs / SP's get business opportunities.
- Current Govt Policies and schemes support and encourage PPP in urban infrastructure projects.

# Implementation through Performance Based Contracts (PBC)

## RESOURCE OPTIMIZATION

- Economy of scale was achieved
- KRA's & SOP's were properly defined to the staff which resulted in meeting desired targets in set working hours.
- Fuel optimization achieved due to proper route mapping.
- Timely maintenance of vehicles helped in lowering vehicle breakdowns and helped in achieving the desired targets.

## STREAMLINING OPERATIONS

- Target was fixed in terms of number of septic tanks to be emptied which helped in arriving at proper route optimization.

## STRENGTHEN BIDDING CAPACITY

- Strengthened technical ability to bid in other cities.
- Due to experience of working through the PBC, it has increased scope to perform better in other cities.

# Lessons learnt and future scope

- With most cities in Maharashtra moving towards ODF++ , **scheduled emptying would be practiced** for which there is a scope for involvement for the private sector.
- **Performance based contractors** is a medium which **safe guards** the interest of the private sector to work with local government.
- Local government **receives good quality of services** with the help of modern tools and techniques.
- Even if the private sector is appointed to provide the service, the **ULB needs to regularly monitor** the quality of service prior to releasing the payment.
- **Formalization of workforce** involved in emptying of septic tanks.
- Indirect taxation helps to accept the service delivery model (Households pay **sanitation tax** instead of high user charges for desludging)

# Thank you
